+98-9391886467

Tehran

Born in 1995. Graduated in computer engineering - software orientation. Interested in new and tough challenges, strongly agrees and interested in teamwork.

Proability in optimizing web functionalities that improve data retrieval workflow efficiencies. Proficient in creating user interface, troubleshooting simple/complex issues and features based on user feedback.

I try to produce high-quality applications. and as a software engineer, I believe in a personal principle 'Good is not enough' This rule helps me never stop improving the quality and always try to learn and be up to date. I am very interested in teamwork and also value responsibility and discipline. Finally, I'm not biased in any technology or tool, and I'll be ready to learn anything.

## Work Experience

### Frontend Developer

Aug 2021 - Present

*Hamrahe Aval (MCI) | Tehran, Iran*

One of the products in the company named Rubika that is a comprehensive application (super app) that has brought together various services for Persian-speaking users around the world. As a frontend developer, I have to work on the virtual class application based in Iran. The product is still in the developing process and it is not released yet.

- Experience working with webrtc
- Experience working with websocket
- Experience building a multiplayer video and voice calling web application

### Frontend Supervisor

Jan 2020 - Jan 2021

*Agah e-Commerce Company | Tehran, Iran*

The big company with many employees who were working on big projects and I started as a frontend developer and after a while I was selected as supervisor of the frontend team.

- Implemented custom components according to the UI/UX team designs
- Created an Angular admin panel application based on Material design to manage native applications.
- Hold meetings with the frontend team and coaching other designers as a supervisor.
- Refactored very large frontend application code to make it more modular and reusable.
- Used Angular i18n in one of the projects

### Frontend Developer

Jan 2017 - Jan 2020

*TAM Company | Tehran, Iran*

A big company with different departments that I was working in the IT department and I was developing the main site of the company and its admin panel.

- Design and development of the main site and the admin panel of the company
- Develop store sites for customers
- Development and work on a dynamic form project with Angular framework
- Involved with various UI kit like bootstrap, material, primeng.

## Frontend Developer

Jan 2017 - Jan 2017

*Ravak Negar Pars | Tehran, Iran*

The company worked in the field of exclusive site design and I was working as a frontend developer, using javascript and JQuery.

- Implement projects using javascript and JQuery
- Use components written in PHP by the backend team and configure them

## Core Skills

Angular 2+, React.js, Typescript, JavaScript, NativeScript, Git, HTML, CSS, SASS, UI Libraries, REST APIs, Object-Oriented Programming (OOP), Responsive Web Design, Scrum, ASP.NET Core, jQuery

## Education

### Islamic Azad University
